Interim Committee on Government Procurement Working Group on Statistical Reporting

MAIN ARGUMENTS ADVANCED IN PREVIOUS DISCUSSIONS HELD IN THE COMMITTEE ON GOVERNMENT PROCUREMENT ON A UNIFORM CLASSIFICATION SYSTEM FOR STATISTICAL REPORTING

Note by the Secretariat

1. At its meeting on 15 November 1994, the Working Group on Statistical Reporting of the Interim Committee on Government Procurement requested the Secretariat to prepare a paper on previous discussions held in the Committee on Government Procurement under the Agreement presently in force, summarizing the arguments advanced on the advantages and disadvantages of the various classification systems. This note has been prepared by the Secretariat in an attempt to respond to the above.

2. Article VI:10(b) of the present Agreement calls for statistics to be reported under a "uniform classification system to be determined by the Committee". Currently, statistics are being reported by 11 of the 12 Parties to the Agreement presently in force in accordance with a Committee decision, taken when that Agreement was implemented, to use 26 categories flowing from the Customs Cooperation Council Nomenclature (CCCN) (GPR/M/1, Annex III). From 1987 to 1990, inconclusive discussions took place in the Committee on Government Procurement with a view to determining a uniform classification system. Out of these discussions, three major classifications came forward as possible bases for a uniform classification system: (1) the UN Central Product Classification (UNCPC); (2) the Harmonized Commodity Description and Coding System of the Customs Cooperation Council (HS); and (3) an adaptation of the existing 26 product categories agreed upon by the Committee in January 1981. However, none of these was capable of giving a global answer to all concerns expressed by delegations. These concerns related to the functionality of the systems, details required, inclusion of services, simplicity, comparability and transparency, and a minimum administrative burden. The final thrust of the discussions was that the UNCPC under the circumstances was the best candidate but that any system chosen by the Committee might need to be modified in order to make it more appropriate for the purposes of the Agreement. Arguments advanced during these discussions on the advantages and disadvantages of the three classification systems are reproduced below.

I. The UNCPC

General

3. The UN Central Product Classification (UNCPC) constitutes a complete product classification covering goods, services and assets. It is a system of categories which is both exhaustive and mutually exclusive. Its final draft was adopted in 1989 by the United Nations Statistical Commission and is applied on a provisional basis for as long as improvements to it continue to be suggested. Its purpose is to provide a framework for international comparison of statistics and to serve as a guide for countries developing or revising an existing scheme in order to make it compatible with the international standard. It was designed as an instrument for assembling and tabulating all kinds of statistics that needed product detail such as production, intermediate and final consumption, capital formation and foreign trade. UNCPC was developed primarily to enhance harmonization among various fields of economic and

related statistics. In order to facilitate concordance, only the products that are produced by a single industry are grouped into one CPC sub-class. When dealing with transportable goods, the UNCPC, with one exception (subdivision group 333, refined petroleum products), uses the headings and subheadings of the HS as building blocks, i.e., each CPC sub-class is an aggregate of one or more headings or subheadings of the HS. As such, the UNCPC is an aggregation of the more detailed HS nomenclature. It consists of 10 sections (identified by the first digit), 69 divisions (identified by the first and second digits), 293 groups (identified by the first three digits), 1,050 classes (identified by the first four digits), and 1,811 subclasses (identified by all five digits, taken together). A copy of the broad structure of the UNCPC is contained in Annex 1.

4. Advantages identified by delegations

- UNCPC is a product-based system which includes service classifications as well.
- The 26 headings of the CCCN (Customs Co-operation Council Nomenclature) categories in use could be easily transposed to the 39 categories (39 divisions of transportable goods) of which the UNCPC consists.

5. Disadvantages identified by delegations

- The UNCPC system is a mixture of commodity and industry classification. UNCPC is not a commodity classification system based on the type of commodity alone; it is rather an industry classification based on the type of business of the supplier. The same product will carry a different code, depending on the supplier of the product. For instance, a motor vehicle purchased from a manufacturer is coded 4911; if it is purchased from a wholesaler/dealer, it is coded 61111; and from a retailer/dealer, it is coded 61112.
- The UNCPC system does not have a specific class or classes for classifying "software packages", a major product procured by governments.
- While the 39 divisions (of transportable goods) at the two-digit level would not be a great improvement over the present system, the 293 divisions at the three-digit level seem excessive.

6. Other observations of delegations

- If adopted, the UNCPC should be used as a commodity classification (i.e. no consideration with respect to the type of supplier) with reporting based on the two-digit 39 divisions of transportable goods.
- Conversion programmes between the UNCPC and other systems currently being used could be developed in collaboration among signatories using the same system, such as Canada and the United States, in converting the Federal Supply Classification (FSC) to UNCPC.

II. HARMONIZED SYSTEM

General

7. The "Harmonized Commodity Description and Coding System" (HS) is an international product nomenclature developed under the auspices of the Customs Co-operation Council (CCC).¹ It is used on an international basis in the classification, description and coding of goods for customs purposes, for the collection of statistical data on imports and exports and for the documentation of transactions in international trade. It was adopted in 1983 and entered into force in 1988. The CONTRACTING PARTIES to the GATT 1947, in their Decision of 12 July 1983, adopted certain procedures to transpose the GATT Schedules of tariff concessions into the Harmonized System Nomenclature. A second revision of the HS is due to be implemented in 1996 and the resulting work linked to GATT concessions will be overseen by the Committee on Market Access in 1995. The HS contains 21 sections, 97 chapters and 1,241 headings at the four-digit level, 930 of which are further divided into subheadings. In total there are 5,019 separate categories of goods identified by a six-digit code. A copy of the broad structure of the HS is contained in Annex 2.

8. The HS covers only goods, not services.

9. Two types of ideas for using the HS for classification purposes have been discussed. One idea was the use of the HS itself. The second idea consisted of "modernizing" the system of 26 product categories by basing them on HS rather than on CCCN as has been the case hitherto.

10. Advantages identified by delegations

- The Harmonized System would bring about harmonization and comparability of statistics, this being one of the system's main purposes.

11. Disadvantages identified by delegations

- The use of HS requires reporting either by 21 sections or by 97 chapters. The 21 sections provide limited details and would in fact be a step backward compared to the existing system of 26 categories of products. The 97 chapters of the HS (two-digit level) would provide extensive details, but require substantial work in gathering and organizing the data.
- The HS is oriented toward commercial items. A classification system for purposes of statistical reporting in the area of government procurement should reflect the needs of governments, including in product areas in which the private sector purchasers are less active. The HS includes several classes for consumer goods, but does not provide details for heavy machinery or military equipment, the main products purchased by government. For textiles, the HS has several chapters; for aircraft, it has only one chapter.
- A tabulation involving the conversion of 616 (four-digit) classes from the FSC system to the HS's two-digit level showed that the FSC classes were barely compatible with the HS sections/chapters. The underlying reason relates to the fact that the FSC and the HS have been designed to serve different purposes: HS is oriented towards commercial items; the FSC system is oriented towards government procurement. The use of the HS, entailing a complex conversion of the FSC system into the HS, would therefore involve significant resources for programming and data collection.

¹Now the World Customs Organization.

- For the above reasons, to adapt the HS for procurement purposes would be difficult and require considerable resources. Assuming that the system chosen by the Committee should be the easiest to adapt to the purposes of the Committee, represent the least amount of work, and be the most efficient, the HS does not seem to be the most appropriate system.

12. Other observations of delegations

- In transposing to the HS, one of the questions to consider would be whether to use HS at the two- or four-digit level. It would be difficult to go beyond the four-digit level.
- A draft transposition of the 26 product categories from the CCCN to the HS, prepared by the delegation of Austria, was circulated in document GPR/W/94 dated 3 April 1989.

III. THE 26 PRODUCT CATEGORIES, ADAPTED

13. The existing system of 26 product categories was designed specifically for purposes of statistical reporting under the Agreement on Government Procurement and agreed upon by the Committee on Government Procurement at its first meeting in January 1981. It is based on the CCCN (Customs Cooperation Council Nomenclature). A complete listing of the 26 categories is contained in Annex 3.

14. Since it was felt that the system did not provide enough detail to identify all products relevant to government procurement, it has been suggested that the number of product categories could be increased from the existing 26 through the inclusion of certain sub-categories for the main products groups purchased by governments. As mentioned in paragraph 9, another idea involved basing the system of 26 categories, in their present form or as adapted, on HS rather than on CCCN, as has been the case up until now.

15. Advantages identified by delegations

- It would be no problem to find concordances between the Federal Supply Classification and the 26 product categories. The existing 26 product categories were manageable and Parties using NIPRO (Nomenclature Commune des Produits Industriels: classification system used by the European Communities to report statistics to the Committee) and the FSC systems could easily re-group commodities into those 26 groups.
- Since it was important not to overburden the reporting system, use of the 26 product categories as a basis for subdividing or adding a few categories in certain fields was preferred.
- Discussion on extension of the number of product categories from the existing 26 could focus on the inclusion of certain sub-categories for the main products groups purchased by governments. For example, category no.14, "Office Machines and Automatic Data Processing Equipment", could be divided to include a sub-category entitled "computers". The Committee could agree on the extent of the breakdown based on the value and volume of procurement in certain product groups.

16. Disadvantages identified by delegations

- The 26 product categories do not cover services.
- The system of 26 product categories is not used by all Parties.

- Identification of some products relevant to procurement requires a more extensive breakdown than the level of detail provided by the current system of 26 product categories.

17. Other observations of delegations

- Further consideration should be given to a suggestion that delegations provide the Secretariat with concordances between the categories used for domestic classification of products procured, and the categories used in the preparation of GATT statistical reports.

Harmonized System (HS)

SECTION 1

Live Animals; Animal Products

Section Notes.

1. Live animals
2. Meat and edible meat offal
3. Fish and crustaceans, molluscs and other aquatic invertebrates.
4. Dairy produce; bird's eggs; natural honey; edible products of animal origin, not elsewhere specified or included.
5. Products of animal origin, not elsewhere specified or included.

SECTION II

Vegetable Products

Section Note.

6. Live trees and other plants; bulbs, roots and the like; cut flowers and ornamental foliage.
7. Edible vegetables and certain roots and tubers.
8. Edible fruit and nuts; peel of citrus fruit or melons.
9. Coffee, tea, maté and spices.
10. Cereals.
11. Products of the milling industry; malt; starches; inulin; wheat gluten.
12. Oilseeds and oleaginous fruits; miscellaneous grains, seeds and fruit; industrial or medicinal plants; straw and fodder.
13. Lac; gums, resins and other vegetable saps and extracts.
14. Vegetable plaiting materials; vegetable products not elsewhere specified or included.

SECTION III

Animal or Vegetable Fats and Oils and Their Cleavage Products; Prepared Edible Fats; Animal or Vegetable Waxes

15. Animal or vegetable fats and oils and their cleavage products; prepared edible fats; animal or vegetable waxes.

SECTION IV

Prepared Foodstuffs; Beverages, Spirits and Vinegar; Tobacco and Manufactured Tobacco Substitutes

Section Note.

16. Preparations of meat, of fish or of crustaceans, molluscs or other aquatic invertebrates.
17. Sugars and sugar confectionery.
18. Cocoa and cocoa preparations.
19. Preparations of cereals, flour, starch or milk; pastrycooks' products.
20. Preparations of vegetables, fruit, nuts or other parts of plants.
21. Miscellaneous edible preparations.
22. Beverages, spirits and vinegar.
23. Residues and waste from the food industries; prepared animal fodder.
24. Tobacco and manufactured tobacco substitutes.

SECTION V

Mineral Products

25. Salt; sulphur; earths and stone; plastering materials, lime and cement.
26. Ores, slag and ash.
27. Mineral fuels, mineral oils and products of their distillation; bituminous substances; mineral waxes.

SECTION VI

Products of the Chemical or Allied Industries

Section Notes.

28. Inorganic chemicals; organic or inorganic compounds of precious metals, or rare-earth metals, of radioactive elements or of isotopes.
29. Organic chemicals.
30. Pharmaceutical products.
31. Fertilizers
32. Tanning or dyeing extracts; tannins and their derivatives; dyes, pigments and other colouring matter; paints and varnishes; putty and other mastics; inks.
33. Essential oils and resinoids; perfumery, cosmetic or toilet preparations.
34. Soap, organic surface-active agents, washing preparations, lubricating preparations, artificial waxes, prepared waxes, polishing or scouring preparations, candles and similar articles, modelling pastes, "dental waxes" and dental preparations with a basis of plaster.
35. Albuminoidal substances; modified starches; glues; enzymes.
36. Explosives; pyrotechnic products; matches; pyrophoric alloys; certain combustible preparations.
37. Photographic or cinematographic goods.
38. Miscellaneous chemical products.

SECTION VII

Plastics and Articles Thereof; Rubber and Articles Thereof

Section Notes.

- 39. Plastics and articles thereof.
- 40. Rubber and articles thereof.

SECTION VIII

Raw Hides and Skins, Leather, Furskins and Articles Thereof; Saddlery and Harness; Travel Goods, Handbags and Similar Containers; Articles of Animal Gut (other than silk-worm gut)

- 41. Raw hides and skins (other than furskins) and leather.
- 42. Articles of leather; saddlery and harness; travel goods, handbags and similar containers; articles of animal gut (other than silk-worm gut).
- 43. Furskins and artificial fur; manufactures thereof.

SECTION IX

Wood and Articles of Wood; Wood Charcoal; Cork and Articles of Cork; Manufactures of Straw, of Esparto or of Other Plaiting Materials; Basketware and Wickerwork

- 44. Wood and articles of wood; wood charcoal.
- 45. Cork and articles of cork.
- 46. Manufactures of straw, of esparto or other plaiting materials; basketware and wickerwork.

SECTION X

Pulp of Wood or of Other Cellulosic Material; Waste and Scrap of Paper or Paperboard; Paper and Paperboard and Articles Thereof

- 47. Pulp of wood or of other fibrous cellulosic material; waste and scrap of paper or paperboard.
- 48. Paper and paperboard; articles of paper pulp, of paper or of paperboard.
- 49. Printed books, newspapers, pictures and other products of the printing industry; manuscripts, typescripts and plans.

SECTION XI

Textiles and Textile Articles

Section Notes.

- 50. Silk
- 51. Wool, fine or coarse animal hair; horsehair yarn and woven fabric.

52. Cotton.
53. Other vegetable textile fibres; paper yarn and woven fabrics of paper yarn.
54. Man-made filaments.
55. Man-made staple fibres.
56. Wadding, felt and non-wovens; special yarns; twine, cordage, ropes and cables and articles thereof.
57. Carpets and other textile floor coverings.
58. Special woven fabrics; tufted textile fabrics; lace; tapestries; trimmings; embroidery.
59. Impregnated, coated, covered or laminated textile fabrics; textile articles of a kind suitable for industrial use.
60. Knitted or crocheted fabrics.
61. Articles of apparel and clothing accessories, knitted or crocheted.
62. Articles of apparel and clothing accessories, not knitted or crocheted.
63. Other made up textile articles; sets; worn clothing and worn textile articles; rags.

SECTION XII

Footwear, Headgear, Umbrellas, Sun Umbrellas, Walking-Sticks, Seat-Sticks, Whips, Riding Crops and Parts Thereof; Prepared Feathers and Articles made Therewith; Artificial Flowers; Articles of Human Hair

64. Footwear, gaiters and the like; parts of such articles.
65. Headgear and parts thereof.
66. Umbrellas, sun umbrellas, walking-sticks, seat-sticks, whips, riding crops and parts thereof.
67. Prepared feathers and down and articles made of feathers or of down; artificial flowers; articles of human hair.

SECTION XIII

Articles of Stone, Plaster, Cement, Asbestos, Mica or Similar Materials; Ceramic Products; Glass and Glassware

68. Articles of stone, plaster, cement, asbestos, mica or similar material.
69. Ceramic products.
70. Glass and glassware.

SECTION XIV

Natural or Cultured Pearls, Precious or Semi-Precious Stones, Precious Metals, Metals Clad with Precious Metal and Articles Thereof; Imitation Jewellery; Coin

71. Natural or cultured pearls, precious or semi-precious stones, precious metals, metals clad with precious metal and articles thereof; imitation jewellery; coin.

SECTION XV

Base Metals and Articles of Base Metal

Section Notes.

- 72. Iron and steel.
- 73. Articles of iron and steel.
- 74. Copper and articles thereof.
- 75. Nickel and articles thereof.
- 76. Aluminium and articles thereof.
